Re: Meadow Ridge Condos

Meadow Ridge Homeowners Association:

Harrisonville Telephone Company (HTC) plans to place fiber optic cable in Bluff View Estates, Bradington Place, Briarhill Subdivision, Grandview Bluff Estates, Hawthorne Place, Indian Hills, and Meadow Ridge. The work conducted and placement of the cable will be in platted utility easements and road right-of-way. We plan to start the work as early as May 26, 2026.

The fiber cable will be placed using a directional boring machine or a vibratory plow. Both are used as alternatives to trenching to minimize disturbance to your area. Placing of the cable will require occasional dig-ups at existing utility crossings. No additional above-ground cabinets or pedestals will be placed, and any new vaults will be installed at grade, flush with the ground. We have contracted the work to Eastern Missouri Industries and RJ Underground LLC. We assure you that any construction damage will be restored following completion.

Once construction is completed, an HTC representative will contact you to coordinate placement of the fiber optic service to your home.

Should you have any questions concerning the project please contact an HTC engineering department customer service representative at 618-939-9369.
